

Princess Sumaya University for Technology
Department of Computer Science
Spring 2022/2023
Graduation Project follow Up

Project Title: EduCare

Project Supervisor: Dr. Sara Tedmori

Team Members: Baha Ayaad, Mohammad Ibrahim Abu-Amara, Mohannad Atmeh

	Meeting Date/Time (DD/MM/YYYY)	Achievements	Next steps	Attendance	Evaluation (out of 100%)	Comments
1	13/03/2023	Agreed on the project idea and how to establish a product that will solve the problem we proposed. Moreover, some functional requirements were discussed in order to manage our timeline, technical aspects, and other related factors.	Research current solutions, write a well defined problem statement, focus on unique features and their feasibilities, tasks partitioning, and project organizations.			
2	21/03/2023	Talk about our progress in project documentation (Chapter 1 is done), discuss how to go through the rest of the tasks, scoping the project both in terms of functional requirements and non-functional requirements.	Project planning (Chapter 2) and Technical Details (Chapter 3), timeline planning during exams, functional requirement scoping, service integration research, Project technical development tools, Interfaces brainstorming.			
3	First and Mid Exams Break					
4	18/04/2023	Talked about the current state of the documentation, and what to improve (be more precise in the overview, have some caption for the tables) discussed current solutions and how it fits into the problem statement and such	Start working on Chapter 4 (System Design) and how the platform will look like in terms of UI/UX, as well as improving the document based on the comment.			
5	Second Exams Break					
6	Project Submission
